The police and firemen attended in bodies as usual, marching from their respective headquarters in command of their officers. The firemen appeared in two groups, the first one early in the afternoon and the second about 5 o'clock.

Mayor McMurray addressed the three groups, wishing the men a happy New Year and urging them to be courteous to the public and to considerate of each other. He shook hands with them all and they signed the visitors' record as usual. Signatures totaled 437 as compared with 425 a year ago and 387 the year before. A delegation of a dozen from the Polish Association, visitors were regaled with cigars, and

The Clerk then read the following Call for the meeting, and announced that a copy of the Call had been served upon each member of the Council:

"December 27, 1929

Dear Sir:

Pursuant to Section 3, Charter Supplement of 1873 and subsequent General Statutes, notice is hereby given that the Members of the Common Council of the City of Plainfield, New Jersey, for the year 1930, will hold their first meeting at the Council Chamber, City Hall, on Wednesday, the first day of January, 1930, at the hour of three o'clock P. M., for the purpose of organizing for the transaction of business, receiving and acting upon communications from the Mayor or other City Official, and the transaction of such other business as may come before the meeting.

The meeting is called for the purpose aforesaid because it is important that the President of the Common Council should be chosen on this date, in order among other things, to provide against the contingency

of the death of the Mayor, in pursuance of Chapter 196 of the laws of 1905 entitled, "An Act to provide who shall act in the case of the death of the Mayor of any City".

Your obedient servant,

George B. Wean,

City Clerk."

The Clerk announced as the first order of business, the election of a president of the Council of 1930, and that nominations are now in order.

Councilman Randolph nominated Councilman Stutsman, the motion being seconded by Councilman Phillips, and adopted.

Councilman Phillips moved the nominations be closed, the motion being seconded by Councilman Sachar, and adopted.

Councilman Rowland moved the City Clerk be directed to cast the ballot for Councilman Stutsman, the motion being seconded by Councilman Scott, and adopted upon a call of the roll, all voting in the affirmative, except Councilman Stutsman, who was excused from voting.

The City Clerk thereupon cast the ballot for Martin B. Stutsman as directed, and declared Councilman Stutsman duly elected President of the Council for 1930; and Councilman Stutsman then took the chair.

The President then announced that Dr. Robert F. Y. Pierce would lead the Council in prayer.

The President then stated that the next order of business was the selection of a City Clerk, and that nominations are now in order. Councilman Rowland nominated George B. Wean, which was seconded by Councilman Edgar. Councilman Rowland moved the nominations be closed, which motion was seconded by Councilman Edgar, and adopted.

Councilman Scott objected to the procedure, and moved the matter be tabled. This motion was not seconded.

The stenographer then distributed blank ballots to each member of the Council and the President appointed Councilmen West and Sachar as Tellers. The Tellers collected the ballots and announced the following result:

Votes cast:

Nine in favor of Mr. Wean as City Clerk
One not in favor of Mr. Wean as City Clerk
One blank

The President thereupon declared George B. Wean duly elected City Clerk. Mr. Wean immediately executed the oath of office before his honor, the Mayor, and thereupon assumed the duties of the office. The oath was ordered filed in the office of the City Clerk.

The President stated that the next order of business would be the election of a stenographer to the Council. Councilman West offered the following resolution to employ Fred Toegel, and moved its adoption, seconded by Councilman Sachar, and adopted upon a call of the roll, all voting in the affirmative.

RESOLVED, That Fred Toegel be and he hereby is employed by the month as Stenographer and Clerk in the office of the City Clerk, and as Stenographer to the Common Council and its Committees, and that his monthly salary is hereby fixed as follows:

As Stenographer and Clerk in the office
of the City Clerk, at the rate of
\$2000.00 per annum, and

As Stenographer to the Common Council and
its Committees, at the rate of \$500.00
per annum

payable semi-monthly as other salaries are paid, the same to take effect upon the adoption of this resolution.

This motion was seconded by Councilman Sachar, and adopted upon a call of the roll, all voting in the affirmative.

Councilman West offered the following resolution to employ John Taylor as Page to the Common Council, and moved its adoption:

RESOLVED, That John Taylor be and he hereby is appointed Page to the Common Council for the year 1930, at a salary of One Hundred Dollars (\$100) per annum.

This motion was seconded by Councilman Edgar, and adopted upon a call of the roll, all voting in the affirmative.

Councilman West presented a copy of the Rules of Order of the Council of 1929, and moved they be adopted as the Rules of Order of the Council of 1930. Councilman Sachar requested that Mr. West make his motion to exclude Rule 29, whereupon Councilman West moved that the Rules of Order of the Council of 1929, with the exception of Rule 29 be adopted as the Rules of Order of the Council of 1930, which motion was seconded by Councilman Edgar, and adopted upon a call of the roll, all voting in the affirmative.

Councilman Randolph moved Rule 39 be suspended.
So ordered.

REPORTS OR COMMUNICATIONS
FROM THE MAYOR OR OTHER CITY OFFICIALS

The sixth annual message from his honor the Mayor, was presented and read, and is as follows:

"January 1, 1930

To the Honorable the Common Council
of the City of Plainfield.

Gentlemen:

In this, my Sixth Annual Message to the Common Council, it is my desire to mention in some detail the constructive work that has been accomplished by the governing bodies since January 1, 1925, when I first assumed office. This will undoubtedly convince the taxpayers that the moneys collected from them during the past five years have been intelligently and properly expended.

The responsibility upon those who carry on municipal government is great, and possibly no single activity is of greater importance than the creation and management of a sound financial program. I have always opposed waste and extravagance, although attractive proposals for the expenditure of public money are brought to official notice every day. But in distinguishing between that which is extravagant and that which is not, there is always the possibility of making mistakes on the side of a supposed but false economy. Some municipalities are forced to limit themselves to bare necessities, and while there are always people who argue against progress and improvements in municipal administration because of the cost, most people want things done reasonably and progressively for their comfort and protection, and are willing to pay for them.

Every citizen is vitally interested in his contribution to the cost of government in the form of taxes. He rightly feels that he is entitled to complete information as to how his money is spent and he is also free to exercise his unquestioned right of criticism of the mayor and common council who spend his money when he entertains any doubt as to the propriety of such expenditures.

A great many people, however, do not realize how little actual control the local governing body has over the amount of taxes to be raised by the City. Some of the items are made mandatory by law, others are of such nature that no one would deem it practicable to change, and the remainder, while variable at the pleasure of the Council, can really be very little reduced if the work of government is to be carried on. For example: the tax rate was \$4.03 in 1929. Of this amount the following items were mandatory under the law:

State taxes	\$.44
County taxes	.60
Local school tax	<u>1.15</u>
Total	\$ 2.19

The local City taxes included the following items which had to be paid without reduction:

Principal and interest on bonded debt.
 Support of the Public Library
 Support of the Joint Sewage Disposal Plant

amounting altogether to \$ 0.65.

There are other items that scarcely anyone would care to see materially reduced, such as expenses of the fire department; police department; street lighting and fire hydrants, amounting in all to \$ 0.65. This leaves as variable items the administrative and executive departments; assessment and collection of taxes; street department; public grounds and buildings; health; charities, courts, recreation and various miscellaneous items, the cost of operating which amounts to only \$ 0.54. Little reduction in these variable items would be possible, certainly not enough to materially affect the total tax rate.

About all that the governing body can hope to do in keeping down the cost of government materially is to avoid increases in necessary operating costs and the undertaking of new projects, either in the way of physical improvements or other governmental activities. So far as the latter are concerned, the council is always under constant pressure to undertake some new governmental activity which must ultimately help to swell the amount of taxes. It frequently happens that these new items are not very large individually, but collectively they serve to make up substantial increases in the cost of government operation.

The following is a list of the improvements:

PERMANENTLY PAVED STREETS.

The streets permanently paved during that period are as follows:

East and West Fourth Street paved from Watchung Avenue to Monroe Avenue

South Avenue paved from Richmond Street to the City line on the east

East and West Seventh Streets made a county road and improved by the city and county jointly, and thereafter to be maintained by the County.

Grant Avenue paved from Front Street to Seventh Street.

New Street widened and paved from Front Street to the railroad

Church Street widened and paved from Front Street to the railroad

Park Avenue widened and paved from Second Street to Front Street

Somerset Street paved from Front Street to Green Brook.

Gavett Place opened and paved from North Avenue to Second Street

North Avenue widened and paved from Watchung Avenue to the Central Railroad Station

making a total of 7.2 miles of sheet asphalt pavement laid.

Other improvements are:

4.2 miles of storm sewers

9.4 miles of sanitary sewers

1.4 miles of old concrete pavement surfaced with sheet asphalt

6.9 miles of bituminous macadam pavement laid

10.2 miles of concrete sidewalks

Other accomplishments are the following:

Greenbrook Park transferred to the County, to be improved at county expense instead of at city expense as before.

Improved methods of accounting and financing introduced, which have resulted in savings of interest charges.

A War Memorial erected to commemorate all wars.

Property purchased and a new Central Fire Headquarters erected at Central Avenue and West Fourth Street, with all

modern improvements and equipment for protecting the property of our citizens.

277 - 600 c. p. lamps, and 10 - 60 c. p. lamps installed.

90 Fire hydrants installed and approximately 10½ miles of water mains laid.

A new public school erected on West Eighth street known as the "Hubbard School."

Auditorium added to the Maxson School

15-room addition to the Emerson School

Addition to the High School

Purchase of the High School Field on Randolph Road

Additional land purchased for the High School

Additional land purchased for the Lincoln School

Additional land purchased for the Emerson School

Purchased property to widen East and West Seventh Street five feet on each side from Crescent Avenue to Plainfield Avenue.

Park Avenue widened eight feet on each side from Fourth Street to Seventh Street, largely through donations of the necessary land by the owners.

Purchased property to widen Cleveland Avenue 2-1/2 ft. on each side from East Fifth Street to East Sixth Street.

Purchased property to widen West Fifth Street 5 feet on each side from Park Avenue to Plainfield Avenue.

Contract given out and work commenced on first section of Cedar Brook storm sewer.

Contract given out and work commenced on first section of storm sewer in the west end from Front Street to Green Brook.

MAJOR IMPROVEMENTS

There are three projects which I consider of major importance for the proper development of the City and which I believe deserve prompt action.

The first is the continuation of our storm drainage system in the Cedar Brook Valley and in the west end of the City.

Both of these projects have been well begun by the letting of contracts for the first section of the Cedar Brook drainage channel, extending from Kenyon Gardens to Watchung Avenue and the first section of the West End storm Sewer, extending from Green Brook to West Front Street at the International Motor plant.

The City is to be congratulated upon the beginning of these two projects, the importance of which has long been recognized and which when completed, are certain to be of great benefit to the City. I hope both these improvements will be continued during the present year. The bids already received on these jobs have shown conclusively that prices for this kind of work are more favorable now than they have been for years, and the City should by all means take advantage of this condition by continuing the same.

The second project is the extension of permanent pavements throughout the city. I am convinced that the construction of macadam pavements should be stopped, except in strictly residential areas which present no probability of heavy traffic conditions for many years to come. Even there permanent pavements would be desirable, but it is probable that their first cost would prohibit their construction at the present time.

The old brick pavement which was constructed on Front Street, Park Avenue and Watchung Avenue in 1907 has served its purpose well, but the surface is worn out after twenty-two years of use and owes the city nothing. Its present condition is a disgrace to our most important business section and the pavement should be resurfaced with sheet asphalt pavement and renewed where necessary without delay.

The macadam pavements on many of our old streets in the central part of the city are worn out and must be rebuilt. Nothing but permanent pavements should be considered in these locations. Some assessments should, in fairness, be made upon abutting lands for benefits derived from the construction of such pavements, but the city should, in my opinion, assume a substantial part of the cost thereof, not only because of the superior service furnished the public, but because maintenance cost, which must be borne by the City, will be very materially reduced.

Park Avenue from Ninth Street to the Middlesex County line should be drained and permanently paved. Substantial aid to this project can be obtained from the County of Union and possibly from the state. This will make the cost to the abutting owners and the City small in comparison with the benefits received.

The third project is the securing of lands for the future improvement of Green Brook for the purpose of increas-

ing its capacity to provide for the natural increase of run-off from its watershed. In my 1929 message I stated that I believed all of the municipalities and townships bordering on Green Brook from the westerly line of the Borough of Dunellen to Scotch Plains should unite in obtaining a sufficient width of land along the stream, which can be controlled by public authority and kept free from buildings and obstructions, so that when the time comes - as it surely must - to widen and deepen this watercourse, the land will be available for the purpose without incurring great expense. Some preliminary engineering work has been done and the matter taken up quite informally with an adjoining municipality, but no real definite action has been taken. This work is of such far-reaching importance to all of the municipalities concerned that it should be actively taken up at once.

MUNICIPAL COLLECTION OF GARBAGE & ASHES

During the past year action has been taken by the Common Council looking to the installation of a system of collection and disposal of municipal refuse. The first step was to secure the services of Messrs. Metcalf & Eddy, consulting sanitary engineers, of Boston, Mass., to advise us as to the best means and methods of collecting and disposing of the garbage, ashes and rubbish of the city.

After the presentation of a report to the Common Council by the Streets and Sewers Committee, which report was published in full in the Courier-News on May 17, 1929, an ordinance was adopted October 7, 1929, based upon a recommendation contained in the Engineers' preliminary report, authorizing the construction of a garbage and rubbish incinerator to be located on city property on the northeasterly side of Rock Avenue between Myrtle Avenue and Green Brook. After the passage of this ordinance, a contract was made with the Consulting Engineers to prepare plans and specifications for the receipt of bids for the construction of an incinerator plant suitable for the needs of the city, and to work out the details of the equipment and methods necessary to collect the refuse.

The project of the collection and disposal of municipal refuse seems to have received general public approval, but, as often happens in such cases, there has been considerable local resistance to the location of the incinerator plant on the proposed site. This is due to the feeling of owners of lands in the vicinity that their property would be depreciated in value and a nuisance created by the location of the plant there.

Reports by our Engineers and 28 separate inquiries made in municipalities of about our own size in the east and middle west, as well as personal examinations which I have

made of several plants, have convinced me that there is no danger of any nuisance from a properly operated modern garbage and rubbish incinerator. I feel too, that while there may be some depreciation of property values in the immediate vicinity of the plant, particularly when it is first installed, practically all of this depreciation will be absorbed in the tract of 51 acres now owned by the City where it is proposed to locate the plant. This means that the entire City will bear such depreciation in value, as it should.

The question of cost of the collection and disposal of municipal refuse has been raised and is, without doubt, a vital one. Estimates of cost under the plan proposed, which I believe to be conservative, indicate that the increase in the tax rate resulting therefrom would not be in excess of thirty points. This means that for every \$1000 of assessed valuation the owner would pay \$3.00 for the cost of collecting and disposing of his household wastes. In other words, a person whose property is assessed at a value of \$5000 would be charged \$15 a year for such service. This I believe is well below the average amount now paid by those householders who are able to obtain service under the present inadequate system. The number of houses now being served are estimated to be about 55 percent of all those in the city.

Since the cost of collection and disposal of refuse would be paid by general taxation, costly residences, business and manufacturing properties would bear a large share of the burden, thereby reducing the cost to the average householder.

Some have said that this would be unfair, since the business and manufacturing properties in particular would get no comparable direct benefit. The fact is that these same properties are now more heavily taxed than the average for schools, storm sewers, sanitary sewers and other items of indirect benefit to them, about which no question is ever raised, because all of these items are municipal necessities, without which the City could not exist and all property values would be enormously reduced.

In this connection let me say that I am strongly opposed to any but the rear door system for the collection of refuse. No other plans have been considered by the Common Council, and the extra cost for such collection as compared with curb collection is included in the estimates. I have heard reports at various times from citizens who favor the collection of garbage and refuse, that while the present council may pass an ordinance or resolution calling for back door collection, future councils could rescind same. This may be possible, but is very im-

probable, as public sentiment in these matters would control any action of the common council. So far as I can see, there would be no more danger of that, than that they would close up several schools, or reduce the personnel of our police or fire department.

Some of our residents seem to think that there will be a parade of ash and garbage trucks on Myrtle Avenue. I do not think they have considered the fact that it will only be necessary to have about twelve trucks, whereas with the present method we have twenty-nine dilapidated garbage and sixty-eight ash and refuse trucks all over the city at all times. Inasmuch as the proposed new trucks will be municipally owned and controlled, rules and regulations will be passed and enforced requiring these trucks to divide the traffic, travelling over designated routes.

There can be no question as to the necessity of the municipal collection and disposal of the various kinds of refuse in the city. Everyone familiar with the facts knows that Plainfield is far behind other cities of its class in carrying out this important municipal function. I feel confident that we are proceeding in the right direction in this matter, and that when once the system is installed and in operation for a short time, the doubts and fears existing in the minds of some of our citizens as to the wisdom of our course will be dissipated.

The Secretary of the Plainfield Chamber of Commerce in his annual report for the fiscal year ending September 30, 1929, has well summarized the conditions in Plainfield which render necessary immediate action by the governing body in the matter of refuse collection and disposal. He says, "Deplorable conditions on properties of families who do not have their garbage and refuse removed, fire hazards lurking in alley-ways and corners of business properties where inflammable waste material is stored awaiting infrequent removal, and the expensive and unsatisfactory service of private carriers now serving only a part of the city make it clear that a municipally operated system would raise health standards, eliminate fire hazards and prove more economical, thereby making the community a more desirable place in which to live." I am sure your honorable body will carry this project through to completion and have same ready for operation without delay.

PUBLIC SCHOOLS

Our schools are well provided for for the next few years, with a seat for every child, full time.

POLICE DEPARTMENT

The morale of our police department is fine,

with the sixty-two members working in harmony for the best interests of the taxpayers. They are a body of men who have willingly, efficiently and fearlessly given of their best at all times.

FIRE DEPARTMENT

The personnel of our fire department, to my mind, is of first-class calibre throughout, and I am thoroughly in favor of keeping our equipment up to that standard which will prove itself capable of meeting every emergency. The department comprises 58 members.

PUBLIC COMFORT STATION

I am assuming that it is the city's intention to extend Gavett Place through to Front Street. In view thereof I believe that a public comfort station should be erected on the remaining portion of the old fire headquarters site now, in order to meet the pressing need for such a service.

MUNICIPAL SWIMMING POOL

In my message of 1929 I earnestly requested the appointment of a committee from your honorable body to study ways and means of providing the city with public pools. While nature has denied us the possession of any considerable body of water, I believe that many of the disadvantages of this state of affairs could be overcome through the installation of public pools. In my opinion, the physical characteristics of our city are such that these baths could find an appropriate place therein.

The following comparisons, in which all figures given are taken from the records except population, clearly indicate that municipal current expenses, and per capita yearly cost of government as well as debt, increases far more rapidly than population or taxable property:

Year	Population (Estimated)	Taxable property	Yearly current expense	Yearly cur- rent expense per Inhabitant	Total City debt per In- Debt habitant
1909	23,000	\$23,430,340	393,778.	17.13	\$617,000 \$26.83
1919	27,500	33,860,782	937,414.	34.19	2,054,685 74.72
1929	36,500	59,491,932	2,597,524.	70.97	5,506,000 150.85

OTHER CITY DEPARTMENTS

During the year just passed I have had the pleasure of coming frequently in contact with the heads of the various

departments of the city, and it gives me pleasure to say that in every instance I have found the officials and their assistants interested in their work, which spirit is commendable.

In conclusion, Gentlemen, I wish to assure you of my earnest desire to co-operate with you in all matters pertaining to the best interest of the city as a whole,

Wishing you one and all a Happy and Prosperous New Year, I am,

Sincerely,

J. T. MacMurray, Mayor."

PARKS AND PUBLIC BUILDINGS, BY CHAIRMAN HANNAFORD:

Reported back the Mayor's veto, dated February 24, 1930, of resolution adopted by the Common Council February 17, 1930, and moved that the Mayor's objections to the said resolution be entered at length upon the journal of the Council so that we may proceed to reconsider said resolution, which motion was seconded by Councilman Sachar, and adopted upon a call of the roll, all present voting in the affirmative. The Mayor's objections were then read and are as follows:

To the Honorable the
Common Council of the
City of Plainfield.

Gentlemen:

I am returning herewith without my approval, resolution adopted by your honorable body on February 17, 1930, reading as follows:

"RESOLVED, that John Taylor be reimbursed for window cleaning, City Hall, at the rate of \$200. per annum, payable in monthly installments."

At the meeting of the Finance Committee of the Common Council (said committee being composed of the eleven members of your honorable body) held January 15, 1930, when the 1930 budget was taken up, certain members of your honorable body at the outset expressed themselves strongly against any increases in salary for any city employee under any and all conditions; and further stated that there was no position within the city government that could not be filled satisfactorily at a salary less than now paid. With this principle established, your members voted consistently against every item of increase contemplated in the salary schedule as presented, and applied the same principle in passing upon the appropriations for departments whose employees and functions are controlled by a separate corporate body, with full power to regular salaries of its employees.

This concerted action and principle is not in accord with the resolution "That John Taylor be reimbursed for window cleaning, City Hall, at the rate of \$200 per annum, payable in monthly installments." The resolution does not state what year you intended the reimbursement to cover. I interpret the word "reimbursement" to mean the act of repaying or refunding for a past performance. I am assuming however, that it was your intention to increase his salary \$200 for the year 1930.

This resolution cannot be considered other than an increase in salary, and to pay this amount under any other name or caption is nothing less than a subterfuge. As Mayor, I have never at any time been against salary adjustments or increases in cases where change of service and responsibility warranted. I do feel that the passing of this resolution is contrary to the principle established by your honorable body, and it is certainly an act of discrimination to the full exclusion of all other city employees.

Respectfully submitted,

J. T. MacMurray, Mayor."

Councilman Hannaford then moved the Council proceed to reconsider the said resolution to which the Mayor made objection in his message of February 24, 1930, which has been read and entered at length upon the journal of the Council so that we may proceed to reconsider said resolution, which motion was seconded by Councilman Wierenga and adopted upon a call of the roll, all present voting in the affirmative.

Councilman Hannaford then moved the resolution be re-adopted notwithstanding the objections of the Mayor. This motion was seconded by Councilman Wierenga, and adopted upon a call of the roll, all present voting in the affirmative.

REPORT AND RESOLUTION BY BRIDGE COMMITTEE NO. 1, 2 & 3.

To the Board of Chosen Freeholders
Court House, Elizabeth, N. J.

Gentlemen:

Your Committee on Bridges in District No. 1, 2 & 3, would report that applications have been made in the past by municipalities for County aid in carrying out storm sewer and drainage projects where same would eliminate county bridges. It is to be expected that similar applications for county aid on these works will be made from time to time in the future as the county builds up and streams are covered over and relocated.

The State Water Policy Commission has certain jurisdiction over streams within the State and exercise control and regulations over same as fixed by law.

Your Committee recommends that when county aid is requested by municipalities for storm sewer and drainage projects that plans for the work contemplated be approved by the State Water Policy Commission before agreements are entered into between the county and municipalities covering the approval of plans and the distribution of cost. The following resolution is therefore introduced:

RESOLVED, by the Board of Chosen Freeholders of the County of Union that all plans for storm sewer and drainage projects prepared by municipalities upon which County aid is requested be approved by the State Water Policy Commission, before agreements covering the work and the distribution of cost be entered into by the County.

FURTHER RESOLVED, That the Clerk forward a copy of this Report and Resolution to each municipality.

THEORY

1. The first part of the book is devoted to the study of the history of the development of the theory of the structure of the atom. It begins with the discovery of the electron by Cathode ray experiment and continues with the discovery of the nucleus by Rutherford's experiment. The author then discusses the development of the quantum theory of the atom, starting with the Bohr model and ending with the modern quantum mechanical model.

EXERCISES

1. Calculate the radius of the first Bohr orbit of a hydrogen atom. (Answer: 0.529 Å)

2. Calculate the energy of the first Bohr orbit of a hydrogen atom. (Answer: -13.6 eV)

3. Calculate the wavelength of the light emitted in the transition of an electron from the second Bohr orbit to the first Bohr orbit of a hydrogen atom. (Answer: 6563 Å)
